## HONG KONG CORE CARDIOLOGY CERTIFICATE COURSE (Module 7)

### “Critical Cardiac Care, Cardiac Oncology, Cryptogenic Stroke & Echo in Daily Practice”

#### ORGANIZING COMMITTEE

- Dr. LAU Yuk Kong (Chairman)
- Dr. TSUI Kin Lam (Co-Chairman)
- Dr. CHAN Ngai Yin
- Prof. SIU Chung Wah, David
- Dr. Thomas TUNGGAL (Co-Chairman)
- Dr. CHAN Yu Ho
- Dr. WONG Chi Yuen, Eric

#### BACKGROUND

One of the most important missions of Hong Kong College of Cardiology (HKCC) is to promote the training and standard of our cardiology professionals so as to translate into better clinical patient care.

In view of the vast and tremendous explosions in knowledge with ever increasing new advances, it is becoming increasingly difficult for cardiologists and fellow trainees to stay abreast and keep up-to-date on core knowledge as well as new frontier technology.

However, the prerequisite of top quality patient care depends highly on core clinical knowledge and experience. Therefore, HKCC determines to launch this first-of-its-kind certificate training course. We are pleased to have Hong Kong Public Hospital Cardiologists Association (HKPHCA), which shares similar aims, to co-organize the course.

#### GOAL

The goal of the course is for our cardiology professionals to enhance their core cardiology knowledge and skill in day-to-day clinical practice.

The course will provide a comprehensive broad base and up-to-date review of clinical diseases and the management. Delegates will also learn from experienced cardiologists the pearls of wisdom. On completion of the 9 modules of certificate training over a 3-year period, delegates will acquire solid clinical knowledge to be highly competent for daily clinical challenges.

#### COURSE DESCRIPTION

The course will consist of 9 modules, each of one-day duration, over the period of 3 years. The preliminary content of the course will include General Cardiology, Coronary Artery Diseases, Valvular Heart Disease, Arrhythmia, Heart Failure & Cardiomyopathy, Preventive Cardiology, Hypertension & Pulmonary Hypertension, Aortic Dissection, Pericardial Diseases, Systemic Diseases & Pregnancy-related Heart Diseases, etc. Approach to patients with symptoms like chest pain, cardiac murmur, shortness of breath, palpitation and syncope, will be addressed. Intelligent & appropriate use of investigations, tips & tricks in interventions and devices usage will be highlighted. The course will also review how to prepare for cardiology examinations.

#### TARGET PARTICIPANTS

All cardiologists in clinical practice will benefit from the course. Due to limited capacity to allow more interaction, cardiology fellows in training who are also members of HKCC / HKPHCA will have priority for enrollment.

#### CERTIFICATION

A short examination will be held at the end of each module. Delegates passing the examination will get a certificate of that module. Upon completion and passing examination of at least 6 out of 9 modules, delegate will get a certificate for the Course.
